

## SCLA 101 – 126

### Oral Presentation Schedule, Spring 2024

#### Professor Bennett

You are responsible for a 3 minute oral presentation that condenses the content of the final research paper into a pitch for the product, service, or idea.

The oral presentation should communicate **all of the elements of your thesis paragraph** and discuss the most **relevant primary and secondary sources** integral to your final research paper. Present and analyze quotes from them and explain how they feature in or inspire the project.

You are permitted to use a single 3x5 inch flashcard on which you can write some notes in case there are features of your presentation that are difficult to commit to memory. However, you are not permitted to use any technological aids, such as PowerPoint (in my experience, these slow things down considerably).
